

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Westinghouse

TRANSFORMERS

All Types
All Capacities

21 Years' Experience in designing and building is back of every Westinghouse Transformer. This experience has been at our cost and your gain.

Westinghouse Electric & Mfg. Co.

Sales offices in all large cities

PITTSBURG, PA.

Cadada; Canadian Westinghouse Co., Ltd., Hamilton, Ont.

Automatic Brakes

The Tendency To-day

is toward car equipments of medium weight, as it has been found that Sunday, holiday and rush-hour traffic can be more efficiently and economically handled with vehicles of medium weight in trains of two to five cars, rather than by adding heavy single cars; It is also easier to secure conductors than motormen.

Hundreds of cars equipped with Westinghouse "AMM" Automatic, Quick-Service, Graduated Release, Quick-Recharge, High-pressure Emergency Air-Brakes are being daily operated by one motorman in trains of one, two, three, four and five cars.

Practically No Wear-Out to

J-M INSULATED CROSS-OVER

The parts of the **J-M Cross-Over** subject to the most wear in service are the detachable, flexible ears attached to the end of each of the four arms, and these can be replaced at a small cost without removing the Cross-Over from the line. Having a straight underrun with flexible end pieces, the hammering effect of the trolley wheel will not cause crystallization of the wire at ends of Cross-Over. It is made of malleable iron, heavily galvanized, with bronze ears, and is insulated between the wires with special thoroughly seasoned fibre. Can be installed without cutting trolley wires, and readily adjusts itself to any angle.

Index to Officials.....	167

IMPORTANT FEATURES OF THIS DIRECTORY.

INDEXES.—The reports of street railway and traction companies in this Directory are arranged geographically by states and cities, and are also numbered consecutively. Immediately following the pages containing the reports, there will be found complete alphabetical lists of both the company names and the individual names appearing in the Directory, with reference by number to the report in which each name appears.

SIGNS. ★ Indicates a report which differs in some respect from the report of the same company in the previous issue of the Directory.

§ Indicates a company not previously reported in the Directory.

† Indicates the name of an individual which appears in the reports of two or more companies. In such cases the sign is omitted in one report and inserted in all other places where the same name appears.

* Indicates (in the alphabetical index to companies) a road which is controlled and operated by another company, the name of the subsidiary company being inserted in the index merely for reference purposes.

THE DATE OF INFORMATION is indicated in each report by the figures at the end of the last line. The final figure indicates the year, and the preceding figure or figures the month. The figures 107 will thus be understood to mean that information for that particular report was furnished in October, 1907. The figures 67 would, in a similar manner, indicate June, 1907, as the date of information. It will be noticed that the great majority of the reports have been received within the two months preceding the date of this Directory.

The figures following the city name indicate the population (by the 1905 or 1906 State or Government (estimate) census for cities of 8000 and over).

For more detailed information regarding capitalization, operating statistics, plant and equipment, etc., reference should be had to our annual "Red Book"—American Street Railway Investments.

Corrections or reports of new companies for this Directory and the "Red Book" are earnestly solicited.

THE NEW POCKETBOOK

STANDARD HANDBOOK

FOR

ELECTRICAL ENGINEERS

Written and Compiled by a
STAFF OF SPECIALISTS

Divided into TWENTY SECTIONS each written by a SPECIALIST of considerable engineering experience, and itself an important treatise, all taken together make the best engineer's pocketbook yet published.

FOR RAILWAY ENGINEERS

SECTION 13, ELECTRIC TRACTION

By A. H. ARMSTRONG

Assistant Engineer, Railway and Traction Dept., General Electric Co.
Member A. I. E. E. and New York Railroad Club

Selection, Calculation and Design of the Complete Equipment for any given Schedule and Track, and the Design, Construction and Cost of Distribution Systems for Trolley Voltages Ranging from 600 Volts d.c. to 11,000 Volts a.c.

This section is complete and without a doubt the best treatise on the subject up to the present date. It is the largest single section in the book.

1300 PAGES. 1260 ILLUSTRATIONS.
FLEXIBLE RED MOROCCO

PRICE, FOUR DOLLARS NET, POSTPAID

32 page descriptive circular, giving table of contents and specimen pages sent on request by the

McGRAW PUBLISHING COMPANY

PUBLISHERS OF THE

The Street Railway Journal, the Electrical
World and The Engineering Record
